

*Family owned since 1963*

**D**arby Ready Mix was founded in 1963 by Randolph Darby in Addison, Michigan. Over the years, Darby has grown from one R190 International to 27 front and rear discharge trucks. Randolph's son, Randy joined the company in 1972 as a driver and has now expanded the operation by replacing the original plant in 2001 with a state-of-the-art facility. Then followed that up in 2006 with another location in Dundee, Michigan. From the early days on, Darby has built it's reputation on personalized customer service and quality. It is our goal to be the right choice for all your concrete needs.

A BETTER  
**CONCRETE**  
ALTERNATIVE

## Service

Darby's capabilities consist of two plants rated at 180 to 200 cubic yards per hour, supported by 27 state certified trucks with experienced drivers. Dispatchers optimize on-time delivery by utilizing state-of-the-art, GPS enabled, truck tracking software. We at Darby understand that production capabilities and on-time delivery **help our customers increase their bottom line.**

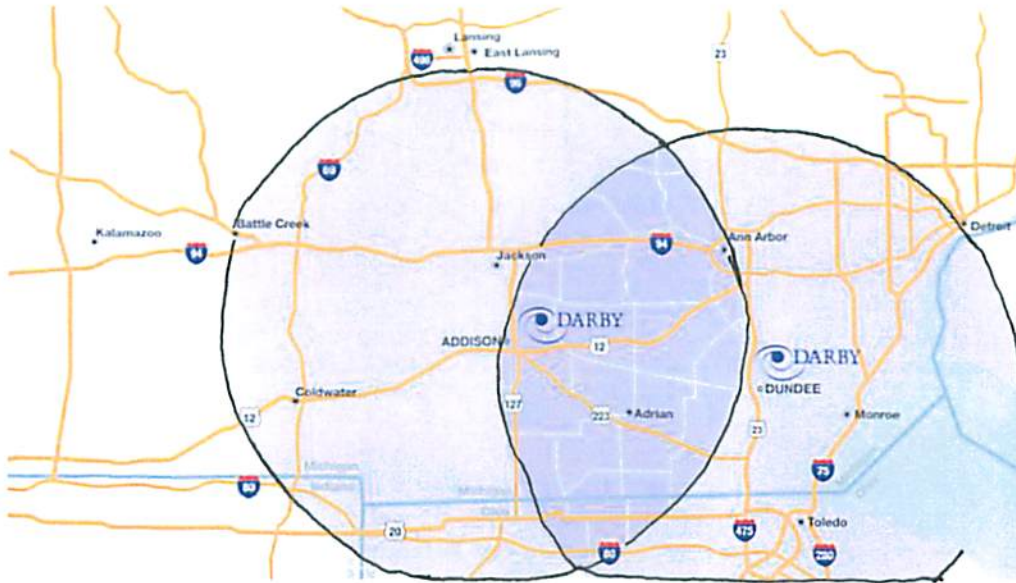

## Quality

Darby's staff consists of 5 concrete technicians that hold either a Level I or II MCA/ACI Certification. This experienced staff designs and supports a wide range of mix designs customized to deliver specific results for residential, commercial, industrial and state projects. Darby's technical department can handle any application from footers to high performance concrete.

Darby services most of southeast Michigan and parts of northwest Ohio. We are open on Saturday and will customize hours depending upon project requirements.

## Construction Products

Darby manufactures various sizes of septic tanks and cattle

feeders and also offers Design Pro retaining walls for your landscaping requirements. In addition, Darby inventories a wide

array of concrete tools and accessories including floats, trowels, hand tools, pipe, rebar, cure and seals, etc.
